

Lecture on

The Social Situation of Negro
Not all the points but the
more for capture and Negro
ones.

Although there were social
gradations among the whites
there was long social mobility
as well: wealth was the
road upward and those
who made it easily com-
manded the respect and gained
the following of those who
already had it.

The approximate fraternities
of color was replacing the
class distinction of class.

(2)

The life and conditions of work
of an overseer were harsh
but the compensation was the
psychological control over the
^{employees'} slaves and the incentive control
over his own.

The mobility of the white
ensured that no substantial
body of white people should
emerge hostile to the system
of slavery and therefore to the
man who controlled it.

Among the whites a democracy
of manner, often obscured
the inequality of ^{men,} substance.
and a sentimental love of
egalitarianism snuffed out a

sentiment born of envy.
